NAVMAN Wireless Integration Guide

About this document

The NAVMAN™ system provides an automated emailing feature to send emails from noreply@navman.com to a configurable email address when the NAVMAN™ GPS crosses configurable boundary points. This automated email message can also be sent as an SMS text message to a mobile phone device through integration with eConfirm.

Follow the steps in this document to setup eConfirm to take incoming NAVMAN email messages and send these out as SMS text messages to configurable mobile numbers.

Setup Process

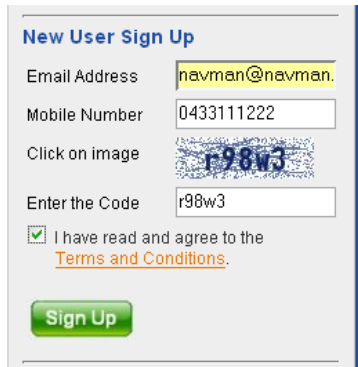

1. Set up an eConfirm Account (if you already have an eConfirm account skip this step)

Using an internet browser go to www.econfirm.com.au and sign up a new account.

Sign up here

You will need a mobile number and email address to sign up a new account.

New User Sign Up

Email Address

Mobile Number

Click on image 

Enter the Code

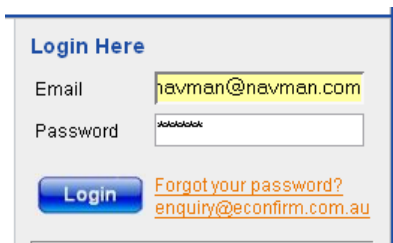

I have read and agree to the [Terms and Conditions.](#)

Enter your mobile number as 04xx xxx xxx, email address then click on the *Click Here* image to get a security code. Enter this code in the box below.

Read and accept the Terms and Conditions of use and click the Sign Up button to create a new account.

2. Log into your new eConfirm account

When you have signed up a new account eConfirm will send you a text message to the mobile number you have registered with that contains your initial 6 character eConfirm password.

Login Here

Email

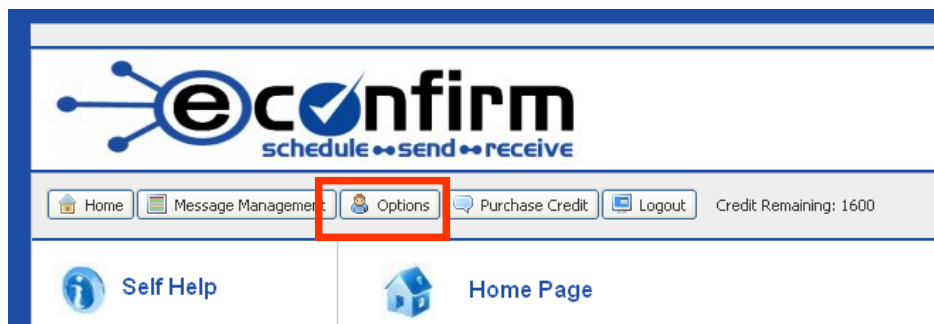

Password

[Forgot your password?](#)
enquiry@econfirm.com.au

Enter your email address and SMS password to log into eConfirm Web Messenger.

3. Set up Email to SMS

Once you have logged into the eConfirm Web Messenger you will initially be on the home page.

Click on the "Options" button to access your user administration.

User Administration

Use this page to update the your main user configuration settings in the eConfirm system. If you need help on a particular user option hold your mouse over the "i" symbol next to the option for an explanation of what it does. When you are done make sure you click the "Update User Options" button for the settings to take effect.

Personal Details		Contact Details	
First Name	<input type="text" value="Navman"/>	Primary contact number	<input type="text" value="0430488589"/>
Surname	<input type="text" value="Wireless"/>	Registration mobile number	<input type="text" value="0430488589"/>
Change Password		Send messages from	<input type="text" value="Your registered mobile"/>
Current Password	<input type="password" value="XXXXXXXXXX"/>	System Settings	
New Password	<input type="password" value="XXXXXXXXXX"/>	Automatic login	<input type="text" value="50"/> days
Repeat New Password	<input type="password" value="XXXXXXXXXX"/>	Timezone	<input type="text" value="Australia/Brisbane"/>
<input type="button" value="Update User Options"/>		Email to SMS	<input type="text" value="Enabled"/>
		Email to SMS Security Key	<input type="text" value="navman"/>

Fill out the user administration form with appropriate details. If you need help with any of the options hover your mouse over the “i” icon next to the option for a full description of what it does.

Note that your current password is the 6 character code that was sent to your phone. It is recommended that you set a new password that is easier to remember.

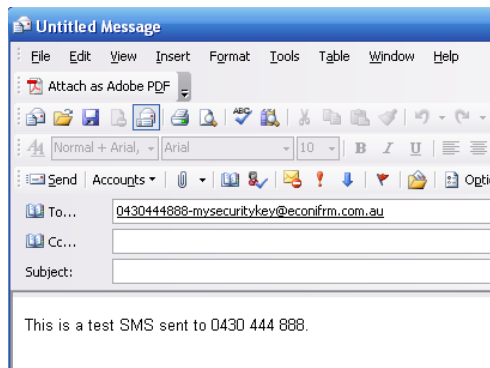

The important options for the Navman Wireless integration are to make sure the “Email to SMS” is set to enabled and the “**Email to SMS Security Key**” has been set to a unique 4 – 20 character word that you can easily remember. The Email to SMS security key is required to uniquely identify your eConfirm user for the email messages sent from NavMan to eConfirm.

4. Test the Email to SMS interface

Open any email client and send an email with the following details

To: 04XXXXXXXX-[Your Email to SMS Security Key]@econfirm.com.au
 Subject:
 Message Body: [Your SMS Message]

An example of the email format is shown below:

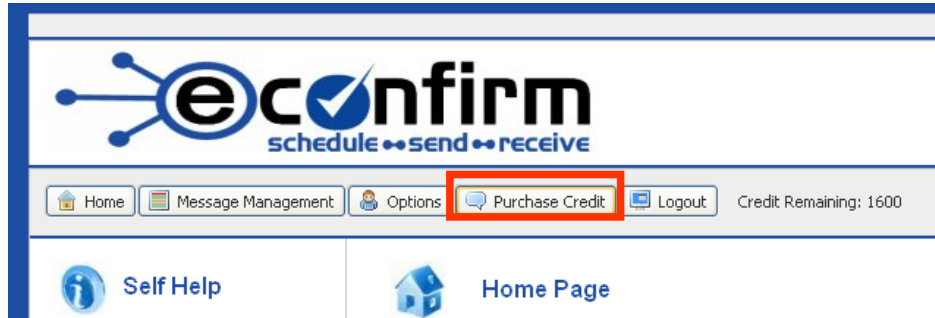

When the email has been sent wait approximately 30 seconds for the SMS message to be sent to the mobile number provided.

5. Set up the Navman Wireless to send emails to your required mobile number

Refer to Navman documentation for setup of GeoFences and email notifications. When configuring the email address use 04XXXXXXXX-[Your Email to SMS Security Key]@econfirm.com.au. Log into eConfirm to set your security key.

6. Purchase eConfirm Credit

Your eConfirm account provided with a handful of credits for testing. When you have used these test credits up you need to purchase credit for continual use of the eConfirm system.

You can purchase credit at any time by logging into eConfirm Web Messenger and clicking on the purchase credit button.

Estimate your messaging requirements and purchase an appropriate eConfirm package. Credit purchases are processed through a Secure Paypal payment system and take effect immediately.
